ABOUT US

Since established in September 2011, AL MASIYA GROUP has been steadily growing and expanding in its scope of operations and the geographical area.

Primarily our company operates as a traditional scaffolding contractor by supplying, hiring and designing with our own material . We give safety a major attention in our designs.

Our services cover a varying range of work types including major construction projects, factories & plant maintenance, buildings renewal & maintenance.

Our company is professionally handling all projects whether large or small. We own large stocks of modular cuplock scaffolding, props, frames system, columns system and curtain wall systems and Scaffolding Accessories.

We are committed to bring safety, high quality and efficient systems to our clients and will enforce these values for all our projects. our understanding to the growing demands within the building industry has driven us to develop quick and easy products to the market professional engineering services that offer perfect solution for each and every requirement. Both sales and rent options are available and according to clients` needs and requirements.
